2.2 – Empathy Map Canvas

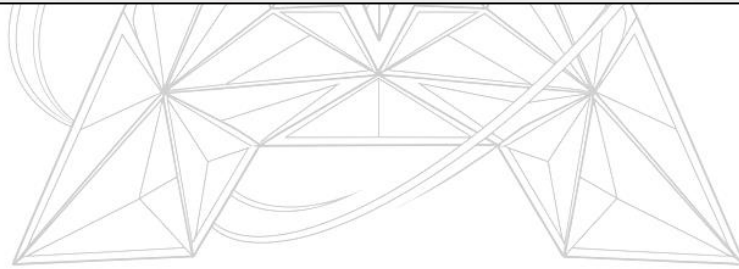

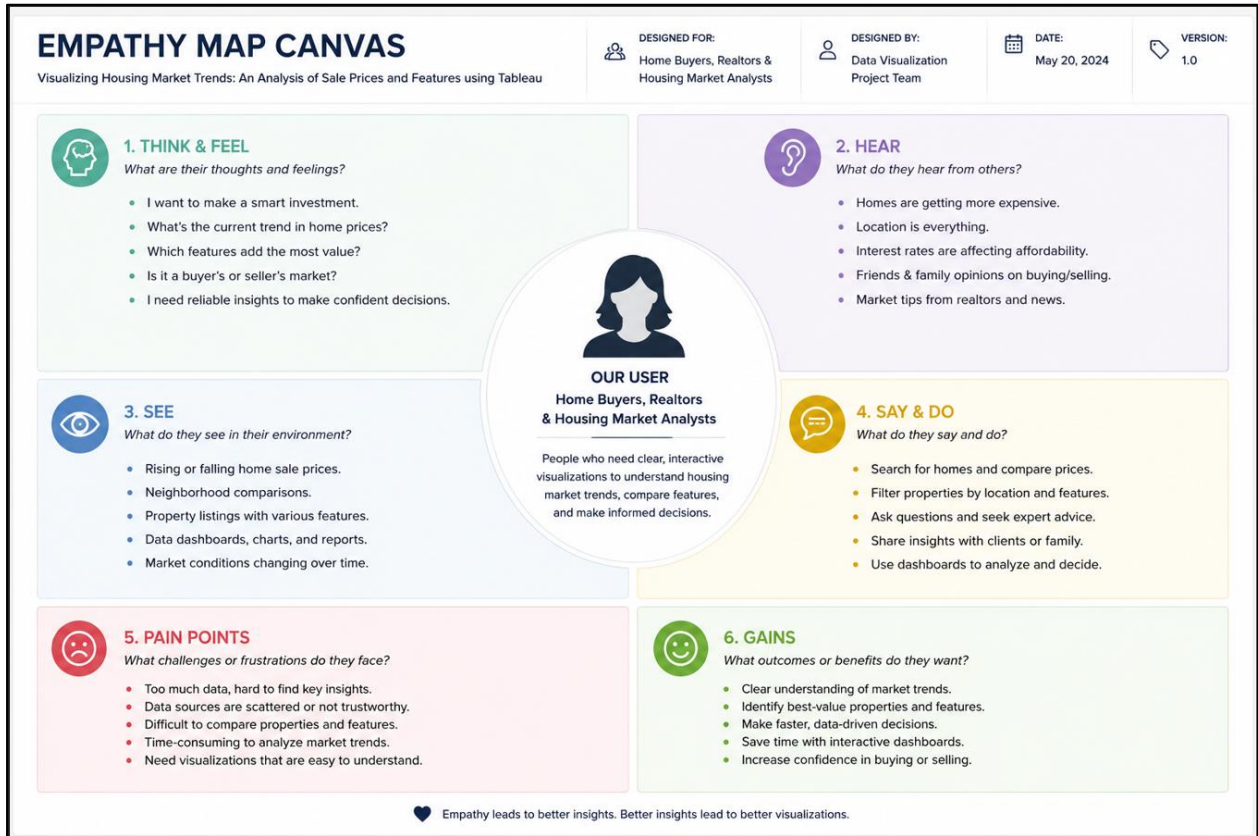

The empathy map for "Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau" is really about understanding what home buyers, sellers and real estate analysts think and feel. Home buyers, sellers and real estate analysts think about things like location and property size when they consider housing prices. They also think about the number of bedrooms and bathrooms and the overall house condition.

- * Home buyers, sellers and real estate analysts need reliable information to compare properties and make good decisions.
- * They need to analyse market data and compare housing features.
- * They use visualization tools to identify pricing patterns and trends in the housing market.

The major challenges for home buyers, sellers and real estate analysts include handling a lot of real estate data. They struggle to understand what a property is really worth. They have a time recognizing what factors affect sale prices the most.

Home buyers, sellers and real estate analysts may feel uncertain because the housing market is always changing. It is hard for them to choose a property that fits their budget and meets their expectations.
