

Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau

TEAM ID	SWTID-2026-1261
PROJECT TITLE	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
MAX MARKS	4 MARKS

2.3 – Brainstorming

The brainstorming phase is about finding out what we want to achieve with the housing market trends project using Tableau. We need to figure out what data we need and what kind of visualizations will help us understand the trends.

We want to know how things like the sale price of a house, where it is located how bedrooms and bathrooms it has and how big it is affecting the housing market.

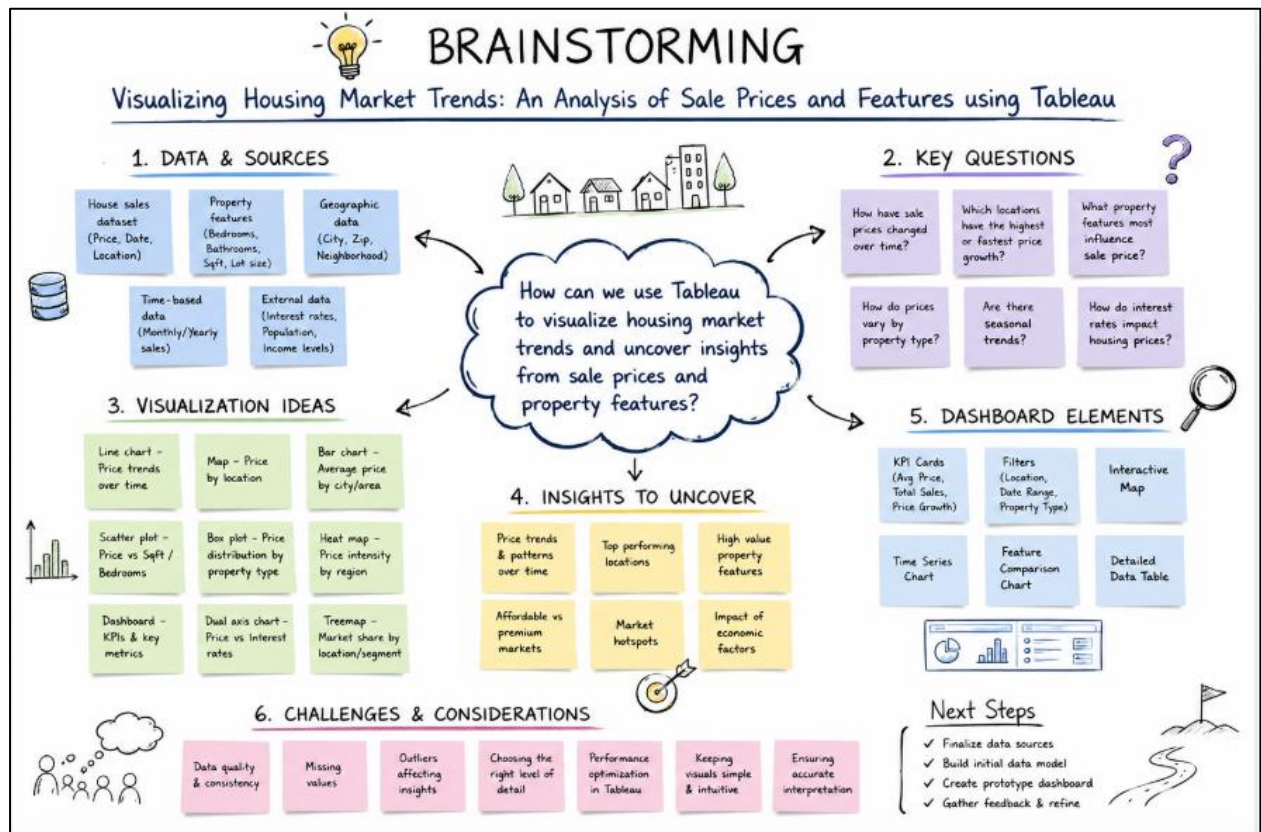

When we brainstormed, we came up with some questions. We want to know what happens to prices over time. We want to know how the features of a house impact the sale price. We also want to decide what kind of visualizations to use, like charts or dashboards to show our findings.

This whole process helped us design a Tableau dashboard that really helps us understand the housing market trends. The dashboard gives us information that we can use to make good decisions, about the housing market trends project using Tableau. We can use Tableau to get a sense of the housing market trends.
