

Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau

TEAM ID	SWTID-2026-1261
PROJECT TITLE	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
MAX MARKS	5 MARKS

CHAPTER – IV PROJECT DESIGN

4.1 – Problem Solution Fit

It gives them real-time information through charts and graphs. Users can find connections, between housing features and prices.

Problems	Tableau-Based Solutions
Large and complex housing datasets are difficult to understand.	Interactive dashboards simplify complex data into visual insights.
Difficulty in identifying housing price trends over time.	Line charts and trend analysis reveal changes in sale prices.
Comparing multiple properties and their features is challenging.	Filters and comparison dashboards enable easy property comparison.
Lack of clarity on factors affecting house prices.	Scatter plots, histograms, and feature analysis identify key price drivers.
Manual analysis is time-consuming and may lead to errors.	Automated visual analysis improves speed and accuracy.
Difficulty in making confident real estate decisions.	Data-driven insights support smarter buying, selling, and investment decisions.
