PROJECT TITLE	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
MAX MARKS	5 MARKS

4.2 – Proposed Solution

The idea for "Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau" is to make a website that helps people understand what is going on in the housing market. This website will take a lot of information about houses and make it easy to see what is happening. The people who will use this website are home buyers, sellers, investors and real estate analysts. They want to know what is going on in the market what prices are. How to make good decisions.

The website has pages that combine all these pictures into one place so people can look at everything at the same time. People can also use filters to look at the information they want like houses in a certain place or houses that cost a certain amount. This helps people get the information they need and make decisions.

Overall, the website is a way to look at what is happening in the housing market. It takes all the information and turns it into pictures that are easy to understand. This helps people make decisions find good opportunities and understand what is changing in the market. The Housing Market Trends website is very helpful for people who want to buy, sell or invest in houses because it gives them the information they need to make decisions.
