4.3 – Solution Architecture

The solution architecture for "Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau" is about taking the housing data and turning it into something that people can understand and use. The Visualizing Housing Market Trends solution architecture is designed to take the raw housing data and make it into visual information that helps people make good decisions.

- The process starts with getting the housing data from files like CSV or Excel.
- Then the housing data gets cleaned up to make sure it is good and accurate. This means getting rid of information fixing mistakes and making sure everything is in the right format.
- After that the cleaned-up housing data goes into Tableau, where it gets organized and ready for analysis.
- The next step is to use kinds of visualizations like line charts, bar charts and maps to understand the housing data.
- These visualizations get put into a dashboards and Stories that lets users play with the housing data.
- The Visualizing Housing Market Trends solution architecture helps these users understand the housing market.
