

CHAPTER – VI

PROJECT DEVELOPMENT

6.1 – Pre-Requisites

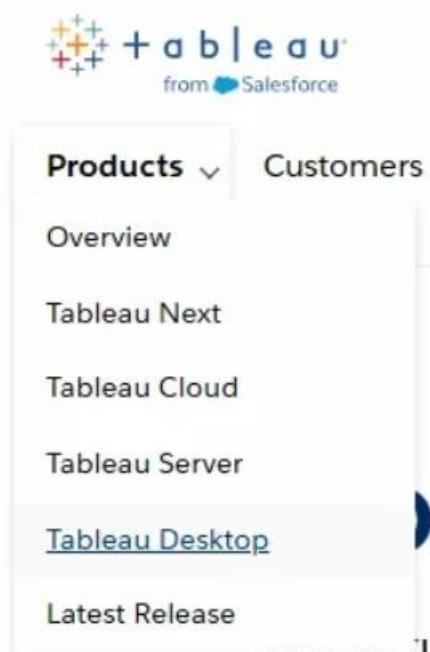

Tableau is a tool for turning data into easy-to-understand charts and reports. It helps businesses analysts and researchers make sense of information.

Installation

Lets install Tableau on our computers.

Step 1: Visit the Tableau Website

Go to the Tableau website and click on the "Products" menu.

Step 2: Explore Tableau Products

Tableau offers products:

Tableau Cloud: A cloud-based platform for data analysis and sharing without needing to manage servers.

Tableau Serve: A self-hosted platform for on-premises or cloud use giving you control over your data and analytics.

Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau

Tableau Desktop: A tool for creating visualizations and dashboards supporting use and in-depth data exploration.

Tableau Next: A focused platform with AI and modular analytics for quicker insights.

Other Product:

- + Tableau Prep for data cleaning
- + Tableau Public for public visualizations
- + Tableau Mobile, for mobile access

We will download the Tableau Desktop.
